HIVE

CONNECT YOUR ORGANISATION WITH HIVE

Is your intranet engaging employees the way it should?

An outdated or underused intranet makes it harder for employees to find information, connect with colleagues, and complete tasks efficiently. This leads to:

- difficulty accessing critical information and workflows
- wasted time navigating fragmented tools
- low adoption due to poor design and usability
- missed opportunities for collaboration and teamwork.

What is HIVE?

HIVE is a fully managed Intranet-as-a-Service (IaaS) solution built on SharePoint and integrated with Microsoft Teams. It runs on a subscription model and works on any device, providing a central hub for communication, collaboration, and productivity.

Teams and collaboration

Real-time updates

- ✓ Centralised access to information
- ✓ Improved compliance and consistency
- ✓ Streamlined processes
- ✓ Integrated digital workplace
- ✓ Simplified submissions and approvals
- ✓ SLA and notification triggers
- ✓ A connected, engaged workforce
- ✓ Better communication and transparency

HIVE powers connected and efficient workplaces

HIVE replaces outdated intranet systems with a dynamic platform that improves engagement and efficiency.

Centralised access to tools and information

Employees can find documents, workflows, forms, and business applications in a single location.

Rapid deployment and customisation

Pre-built industry templates and customisable options support quick implementation.

Enhanced employee engagement

Social features, intuitive design, and custom dashboards create a more engaging digital workplace.

Fully managed and scalable

A subscription-based model removes upfront costs and scales with your business.

Why choose HIVE?

Workplace communication should be simple. No more clunky intranets or endless searches for the right document. HIVE brings everything into one easy-to-use hub, built on Microsoft Teams and SharePoint, so teams can connect, collaborate, and get things done.

ASI Solutions delivers technology that works, backed by decades of experience and trusted partnerships. HIVE is fully managed, mobile-friendly, and designed for high adoption. The flexible subscription model keeps costs predictable, and ASI handles the setup, maintenance, and support.

HIVE removes the hassle and helps teams work smarter.
